AI25BTECH11012 - GARIGE UNNATHI

## Question:

Prove that the three points **A** (-4,6,10) , **B** (2,4,6) and **C** (14,0,-2) are collinear.

## Solution:

Variable	Formula
$A$	$A = \begin{pmatrix} -4 \\ 6 \\ 10 \end{pmatrix}$
$B$	$B = \begin{pmatrix} 2 \\ 4 \\ 6 \end{pmatrix}$
$C$	$C = \begin{pmatrix} 14 \\ 0 \\ -2 \end{pmatrix}$

TABLE 0: Variables Used

If ABC are collinear , then the matrix should have rank 1.

$$(\mathbf{B} - \mathbf{A} \quad \mathbf{C} - \mathbf{A})^T$$

$$(\mathbf{B} - \mathbf{A} \quad \mathbf{C} - \mathbf{A})^T = \begin{pmatrix} 6 & -2 & -4 \\ 18 & -6 & -12 \end{pmatrix} \quad (0.1)$$

$$R_2 = R_2 - 3R_1 \quad (0.2)$$

$$\begin{pmatrix} 6 & -2 & -4 \\ 0 & 0 & 0 \end{pmatrix} \quad (0.3)$$

Since all the elements of  $R_2$  are zero, the rank of the matrix is one.  
Hence ABC are collinear points.
