### Read the following instructions carefully

- 1) This question paper contains **24** printed pages including pages for rough work. Please check all pages and report discrepancy, if any.
- 2) Write your registration number, your name and name of the examination centre at the specified locations on the right half of the ORS.
- 3) Using HB pencil, darken the appropriate bubble under each digit of your registration number and the letters corresponding to your paper code.
- 4) All the questions in this question paper are of objective type.
- 5) Questions must be answered on **Objective Response Sheet (ORS)** by darkening the appropriate bubble (marked A, B, C, D) using HB pencil against the question number on the left hand side of the ORS. **Each question has only one correct answer.** In case you wish to change an answer, erase the old answer completely. More than one answer bubbled against a question will be treated as a wrong answer.
- 6) Questions 1 through 20 are 1-mark questions and questions 21 through 85 are 2-mark questions.
- 7) Questions 71 through 73 is one set of common data questions, questions 74 and 75 is another pair of common data questions. The question pairs (76, 77), (78, 79), (80, 81), (82, 83) and (84, 85) are questions with linked answers. The answer to the second question of the above pairs will depend on the answer to the first question of the pair. If the first question in the linked pair is wrongly answered or is un-attempted, then the answer to the second question in the pair will not be evaluated.
