Question: If \mathbf{A} , \mathbf{B} , \mathbf{C} are mutually perpendicular vectors of equal magnitudes, show that $\mathbf{A} + \mathbf{B} + \mathbf{C}$ is equally inclined to \mathbf{A} , \mathbf{B} and \mathbf{C} .

Solution: Given:

$$\mathbf{A}^\top \mathbf{B} = 0 \quad (0.1)$$

$$\mathbf{B}^\top \mathbf{C} = 0 \quad (0.2)$$

$$\mathbf{C}^\top \mathbf{A} = 0 \quad (0.3)$$

$$\|\mathbf{A}\| = \|\mathbf{B}\| = \|\mathbf{C}\| = k \quad (0.4)$$

This implies:

$$\mathbf{A}^\top \mathbf{A} = \|\mathbf{A}\|^2 = k^2 \quad (0.5)$$

$$\mathbf{B}^\top \mathbf{B} = \|\mathbf{B}\|^2 = k^2 \quad (0.6)$$

$$\mathbf{C}^\top \mathbf{C} = \|\mathbf{C}\|^2 = k^2 \quad (0.7)$$

Let

$$\mathbf{R} = (\mathbf{A} + \mathbf{B} + \mathbf{C}) \quad (0.8)$$

The cosine of the angle θ between two vectors \mathbf{X} and \mathbf{Y} is given by

$$\cos \theta = \frac{\mathbf{X}^\top \mathbf{Y}}{\|\mathbf{X}\| \|\mathbf{Y}\|} \quad (0.9)$$

$$\|\mathbf{R}\|^2 = \mathbf{R}^\top \mathbf{R} \quad (0.10)$$

$$= (\mathbf{A} + \mathbf{B} + \mathbf{C})^\top (\mathbf{A} + \mathbf{B} + \mathbf{C}) \quad (0.11)$$

$$= (\mathbf{A}^\top + \mathbf{B}^\top + \mathbf{C}^\top) (\mathbf{A} + \mathbf{B} + \mathbf{C}) \quad (0.12)$$

$$= \mathbf{A}^\top \mathbf{A} + \mathbf{A}^\top \mathbf{B} + \mathbf{A}^\top \mathbf{C} + \mathbf{B}^\top \mathbf{A} + \mathbf{B}^\top \mathbf{B} + \mathbf{B}^\top \mathbf{C} + \mathbf{C}^\top \mathbf{A} + \mathbf{C}^\top \mathbf{B} + \mathbf{C}^\top \mathbf{C} \quad (0.13)$$

$$= \|\mathbf{A}\|^2 + 0 + 0 + 0 + 0 + \|\mathbf{B}\|^2 + 0 + 0 + 0 + \|\mathbf{C}\|^2 \quad (0.14)$$

$$= k^2 + k^2 + k^2 \quad (0.15)$$

$$= 3k^2 \quad (0.16)$$

Therefore, $\|\mathbf{R}\| = \sqrt{3}k$.

Now, let α be the angle between \mathbf{R} and \mathbf{A} .

$$\cos \alpha = \frac{\mathbf{R}^\top \mathbf{A}}{\|\mathbf{R}\| \|\mathbf{A}\|} \quad (0.9) \quad (0.17)$$

$$= \frac{(\mathbf{A} + \mathbf{B} + \mathbf{C})^\top \mathbf{A}}{\|\mathbf{R}\| \|\mathbf{A}\|} \quad (0.18)$$

$$= \frac{\mathbf{A}^\top \mathbf{A} + \mathbf{B}^\top \mathbf{A} + \mathbf{C}^\top \mathbf{A}}{\|\mathbf{R}\| \|\mathbf{A}\|} \quad (0.19)$$

$$= \frac{\|\mathbf{A}\|^2 + 0 + 0}{\|\mathbf{R}\| \|\mathbf{A}\|} \quad (0.20)$$

$$= \frac{k^2}{(\sqrt{3}k)(k)} \quad (0.21)$$

$$= \frac{k^2}{\sqrt{3}k^2} \quad (0.22)$$

$$= \frac{1}{\sqrt{3}} \quad (0.23)$$

Let β be the angle between \mathbf{R} and \mathbf{B} .

$$\cos \beta = \frac{\mathbf{R}^\top \mathbf{B}}{\|\mathbf{R}\| \|\mathbf{B}\|} \quad (0.9) \quad (0.24)$$

$$= \frac{(\mathbf{A} + \mathbf{B} + \mathbf{C})^\top \mathbf{B}}{\|\mathbf{R}\| \|\mathbf{B}\|} \quad (0.25)$$

$$= \frac{\mathbf{A}^\top \mathbf{B} + \mathbf{B}^\top \mathbf{B} + \mathbf{C}^\top \mathbf{B}}{\|\mathbf{R}\| \|\mathbf{B}\|} \quad (0.26)$$

$$= \frac{0 + \|\mathbf{B}\|^2 + 0}{\|\mathbf{R}\| \|\mathbf{B}\|} \quad (0.27)$$

$$= \frac{k^2}{(\sqrt{3}k)(k)} \quad (0.28)$$

$$= \frac{k^2}{\sqrt{3}k^2} \quad (0.29)$$

$$= \frac{1}{\sqrt{3}} \quad (0.30)$$

Let γ be the angle between \mathbf{R} and \mathbf{C} .

$$\cos \gamma = \frac{\mathbf{R}^\top \mathbf{C}}{\|\mathbf{R}\| \|\mathbf{C}\|} \quad (0.9) \quad (0.31)$$

$$= \frac{(\mathbf{A} + \mathbf{B} + \mathbf{C})^\top \mathbf{C}}{\|\mathbf{R}\| \|\mathbf{C}\|} \quad (0.32)$$

$$= \frac{\mathbf{A}^\top \mathbf{C} + \mathbf{B}^\top \mathbf{C} + \mathbf{C}^\top \mathbf{C}}{\|\mathbf{R}\| \|\mathbf{C}\|} \quad (0.33)$$

$$= \frac{0 + 0 + \|\mathbf{C}\|^2}{\|\mathbf{R}\| \|\mathbf{C}\|} \quad (0.34)$$

$$= \frac{k^2}{(\sqrt{3}k)(k)} \quad (0.35)$$

$$= \frac{k^2}{\sqrt{3}k^2} \quad (0.36)$$

$$= \frac{1}{\sqrt{3}} \quad (0.37)$$

Since $\cos \alpha = \cos \beta = \cos \gamma = \frac{1}{\sqrt{3}}$, it implies $\alpha = \beta = \gamma$.

Thus, $\mathbf{A} + \mathbf{B} + \mathbf{C}$ is equally inclined to \mathbf{A} , \mathbf{B} and \mathbf{C} .

Mutually Perpendicular Vectors and Their Sum
