EE25BTECH11020 - Darsh Pankaj Gajare

- ·	of intensity, then the meaning of the words ($simmer \rightarrow see the \rightarrow smolder$) \rightarrow]. Which one of the given options is appropriate to fill [$GATE\ EE\ 2025$]
a) obfuscate	c) fracture
b) obliterate	d) fissure
house-numbers on the other total number of houses is the	e of a road are consecutive odd integers starting from 301, while the de of the road are consecutive even numbers starting from 302. The same on both sides of the road. the house-numbers between the two sides of the road is 27, then the
a) 27	c) 54
b) 52	d) 26
3) For positive integers p and q	with $\frac{p}{q} \neq 1$, $\left(\frac{p}{q}\right)^q = p^{\left(\frac{p}{q}-1\right)}$, Then,

a) $q^p = p^q$

[*GATE EE* 2025]

c) $\sqrt{q} = \sqrt{p}$

b) $q^p = p^{2q}$

d) $\sqrt[p]{q} = \frac{q}{\sqrt{p}}$

4) Which one of the given options is a possible value of *X* in the following sequence? 3, 7, 15, *X*, 63, 127, 255 [*GATE EE* 2025]

a) 35

c) 45

b) 40

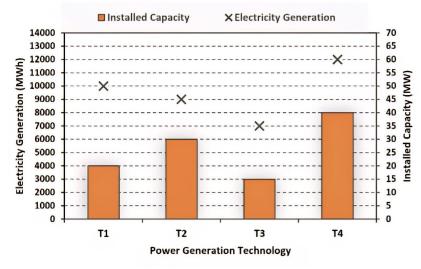

d) 31

5) On a given day, how many times will the second-hand and the minute-hand of a clock cross each other during the clock time 12:05:00 hours to 12:55:00 hours? [GATE EE 2025]

- a) 51 c) 50
- b) 49 d) 55
- 6) In the given text, the blanks are numbered (i) (iv). Select the best match for all the blanks. From the ancient Athenian arena to the modern Olympic stadiums, athletics (i) the potential for a spectacle. The crowd (ii) with bated breath as the Olympian artist twists his body, stretching the javelin behind him. Twelve strides in, he begins to cross-step. Six cross-steps (iii) in an abrupt stop on his left foot. As his body (iv) like a door turning on a hinge, the javelin is launched skyward at a precise angle.

[*GATE EE* 2025]

- a) (i) hold (ii) waits (iii) culminates (iv) (i) hold (ii) wait (iii) culminate (iv) pivots pivot
 - d) (i) holds (ii) waits (iii) culminate (iv)
- b) (i) holds (ii) wait (iii) culminates (iv) pivots pivot
- 7) Three distinct sets of indistinguishable twins are to be seated at a circular table that has 8 identical chairs. Unique seating arrangements are defined by the relative positions of the people. How many unique seating arrangements are possible such that each person is sitting next to their twin? [*GATE EE* 2025]
 - a) 12 c) 10
 - b) 14 d) 28
- 8) The chart given below compares the Installed Capacity (MW) of four power generation technologies, T1, T2, T3, and T4, and their Electricity Generation (MWh) in a time of 1000 hours (h).

The Capacity Factor of a power generation technology is: Capacity Factor = $\frac{\text{Electricity Generation } (MWh)}{\text{Installed Capacity } (MW) \times 1000 \ (h)}$ Which one of the given technologies has the highest Capacity Factor?

a) T1b) T2		c) T3 d) T4	
9) In the 4×4 array s	hown below, each cell of the f	first three columns has either a co	ross(X) or a number,
as per the given r	ule. 2 X 3 Rule: T	The number in a cell represents	the count of crosses
	ate neighboring cells (left, right) at the maximum number of cross	ght, top, bottom, diagonals). sees possible in the empty colun	on is:
a) 0		c) 2	
b) 1		d) 3	
	use is measured to be 89.85°,	form a right triangle. If the Moothe ratio of the Earth-Sun and E	_
a) 328		c) 238	
b) 382		d) 283	
For Amma, the diffect strongly about would have dismiss white middle-class the oppression of exploitation and in	women's rights but was not for seed Betty Friedan because so women in the United States. women from the wider strugmentalism. So Amma continuation	ge is that of: men was a kind of discrimination amiliar with concepts like gende the was predominantly dealing was Amma, and women of her gene ggle for the liberation of huma ued to play her role as mother one wipes their emotional dirt off	er and patriarchy. She with the problems of eration, could de-link an beings from class and wife, but would
a) Compromise		c) Contentment	
b) Protest		d) Resignation	
I am wearing for t time, as they are he they exert on my pain makes me si (ii) that by my (iii)	he first time some (i)orribly tight. I usually put then feet goads my oratorical capaing like a nightingale or like tare too tight. The visceral process.	ence for the following passage: that I have never been able in on just before giving a lecture. Incities to their utmost. This share the one of those Neapolitan sin bysical longing, the overwhelm in words distilled and sublime t suffer.	The painful pressure rp and overwhelming agers who also wear ning torture provoked

a) 37	c) 51
b) 43	d) 38
 18) On the basis of the statements given below, who Statements: a) Life has suffering b) Desire is the cause of suffering c) The end of desire is the end of suffering d) Desire can be reduced by following the noble Assumptions: 	
a) Suffering is because of wantsb) Life is not always full of suffering	c) The eightfold path can reduce sufferingd) Suffering is caused by life
	[GATE EE 2025]
a) Only 1, 3 and 4	c) Only 1 and 4
b) Only 1, 2 and 3	d) Only 2 and 3
19) If 'KARAMCHAND' is coded as 'ICPCKEFCI [GATE EE 2025]	LF' what should be the code of 'CREATION'?
a) ATCCRRKMP	c) APCCRJMP
b) ETGCVKQP	d) ETCGKRPM
20) Given an input line of numbers and words, a mageach step. Here is an illustration of an input and Input: 61 wb ob 48 45 29 34 sb pb lb Step 1: lb wb ob 48 45 29 34 sb pb 61 Step 2: lb ob wb 45 29 34 sb pb 61 48 Step 3: lb ob pb wb 29 34 sb 61 48 45 Step 4: lb ob pb sb wb 29 61 48 45 34 Step 5: lb ob pb sb wb 61 48 45 34 29 Step 5 is the last step of the above arrangement Based on the rules followed in the above steps, Input: cb kb eb 58 49 23 38 jb nb gb 69 82 Which of the following represents the position of (Step - 5 is the last step of the arrangement.) [GATE EE 2025]	answer the following question: of 58 in the fourth step?
a) Second from the left	c) Third from the right
b) Fourth from the right	d) Seventh from the left

21) In a certain type of code, they play cricket together' is written as mv kb lb iv'; they score maximum points' is written as gb lb mb kv'; cricket score earned points' is written as mb gv kb kv' and points are earned together' is written as kv mv ob gv.' What is the code for earned maximum points'?

[GATE EE 2025]

a) gv gb kv

c) lb iv ob

b) mv kb mb

d) ob mv iv

22) Which of the statement (*s*) about the passage weaken (*s*) the argument presented? Scientists associate large brains with greater intelligence. However, in the evolutionary context it has also been identified that beyond a point, the size of the brain has not increased and yet after a particular period, in spite of no significant change in brain size humans have made significant progress. Certain researchers propose that this is because, while the overall brain size may not have changed, marked structural changes can be noticed in specific structures that run parallel to increase in human intelligence.

[*GATE EE* 2025]

a) Recent studies refute the hypothesis that regionspecific brain development is necessarily associated with rapid human progress future may happen because of its rapid brain development

- b) Neanderthal people's extinction was probably because of their brain size
- d) Recent studies show that Neanderthal people,
 y with relatively smaller brains, were capable of complex language and social activities
- c) Homo Sapiens and its destruction in the
- 23) The narrator's use of I' in the given passage is/are:

I have never been any good at the more lurid sort of writing. Psychopathic killers, impotent warheroes, self-tortured filmstars, and seedy espionage agents must exist in the world, but strangely enough I do not care across them, and I prefer to write about the people and places I have known and the lives of those poets I have crossed. This crossing of paths makes for stories rather than novels, and although I have worked in both mediums, I am happier being a short-story writer than a novelist.

[*GATE EE* 2025]

a) Self-conscious

c) Confessional and communicating

b) Apologetic and regretful

- d) Egotistical and vain
- 24) Which of the following recommended action (*s*) seem to be appropriate with the stated problem? Stated problem: Many students at educational institutes do not attend classes in the post-pandemic scenario.

- a) Disciplinary action against all students should: Surveys should be conducted to identify the be taken as a warning. reasons for their absence.
- b) Counselling sessions should be organized toll) Course content should immediately be changed. address the issues such students face.

25) Read the passage and identify the statement (s) which follow (s) from it:

The purpose of this work is to inform educators about the brain science related to emotion and learning, and, more important, to offer strategies to apply these understandings to their own teaching. Although many of the approaches I describe will be familiar, integrating the tiers of emotion and the brain may be a new concept. As an educator I had been trained in how to deliver content and organize my lessons, but I had not been taught how to design learning experiences that support emotions for learning.

[*GATE EE* 2025]

- a) The author wishes, through his work, to inform us about brain science and learning.

 proach lies in linking emotion-oriented approach to health.
- b) The author, through his work, wishes to offed) The author wants to use emotions as a strategy strategies to apply our learnings to our teaching. for learning.
- c) The author feels that the newness of his ap-
- 26) If A says that his mother is the daughter of B's mother, then how is B related to A? [GATE EE 2025]

a) Uncle c) Father

b) Aunt d) Brother

27) Which one of the following measures in the Keynesian framework is adopted to tame inflation in an economy?

[*GATE EE* 2025]

a) Reduction in government spending

c) Reduction in the repo rate

b) Reduction in the bank rate

- d) Increase in merchandise exports
- 28) If the difference between actual GDP and the trend output varies inversely with the difference between actual unemployment rate and the natural rate of unemployment, then such a relationship is called the

[*GATE EE* 2025]

a) Okun's law

- c) Taylor Rule
- b) New Keynesian aggregate supply curve
- d) New Keynesian Phillips curve
- 29) In the sticky-price model of aggregate supply, if none of the firms in the market have flexible prices, then the short-run aggregate supply curve will be [GATE EE 2025]

a) horizontal

flexible prices

b) vertical

- d) upward sloping to the right
- c) steeper than it would be if some firms had
- 30) When transfer of income happens from the "not richer" individual to the "not poorer" individual, then such a transfer is known as [GATE EE 2025]

- a) Regressive transfer
- b) Additive transfer

- c) Direct transfer
- d) Indirect transfer
- 31) In the context of the Harris-Todaro model of rural-urban migration, which one of the following is TRUE? [GATE EE 2025]
 - a) Unemployment in the urban sector emerges: Unemployment in the urban sector emerges bebecause rural-urban migration occurs primarily due to the higher expected wage income in the urban sector
 - b) Unemployment in the urban sector emerges bed) Unemployment in the rural sector emerges because rural workers migrate to the cities and towns due to the expected shortage of unskilled labour in the urban sector

cause the rural wage rate is institutionally fixed by the local body at a higher level than the urban wage rate

cause urban workers migrate to the rural sector due to the higher expected wage income in the advanced economies

- 32) The Minimum Support Prices in India are notified based on the recommendations of which one among the following Commissions? [*GATE EE* 2025]
 - a) Commission for Agricultural Costs and Prices **Prices**

 - b) Commission for Farmers' Benefits and Costs d) Commission for Agricultural Subsidy Benefits
 - c) Commission for Agricultural Subsidy Costs and and Costs
- 33) In an economy, the dependency ratio is the ratio of

[*GATE EE* 2025]

- a) non-working age group population to the worke) number of unemployed to employed workers in ing age group population
- b) number of children to adults in the total popud) total foreign aids and grants to the total (net) lation
- the total labour force
- factor income from abroad
- 34) Which one of the following is NOT a source of finance of the Government of India? [GATE EE 2025]
 - a) Land revenue

c) Corporate tax

b) Income tax

- d) Import duty
- 35) In the Keynesian closed economy *IS-LM* model, where interest rate is plotted along the vertical axis and output is plotted along the horizontal axis, the product market schedule will be [GATE EE 2025]
 - a) relatively steeper if the interest elasticity of) relatively steeper if the interest elasticity of investment is low
 - investment is very high
 - propensity to save
 - b) relatively steeper, the higher the marginald) relatively flatter when the interest elasticity of money demand is very high
- 36) In the Keynesian system, the speculative demand for money arises because of [GATE EE 2025]
 - a) uncertainty of future interest rates
- c) unexpected out-of-pocket expenditure
- capital gains
- b) uncertainty regarding bond prices and associated) the gap that emerges between income and sudden eventual expenditure
- 37) Which of the following statements is/are TRUE?

- a) A firm experiences economies of scale where) A firm experiences economies of scale when an increase in its output of a good or service brings a reduction in the average total cost of production
- b) A firm experiences economies of scope when and) A firm experiences economies of scope when an increase in its range of goods produced brings down the average total cost of production
- an increase in the range of products produced brings down the short-run average total cost of production
 - increase in its output of a good or service brings a reduction in the marginal cost of production
- 38) Let x_1, x_2, \dots, x_n be an independently, and identically distributed (*iid*) random sample drawn from a population that follows the Normal Distribution $N(\mu, \sigma^2)$, where both the mean (μ) and variance (σ^2) are unknown. Let \bar{x} be the sample mean. The maximum likelihood estimator (MLE) of the variance $(\hat{\sigma}_{MLE}^2)$ is/are then characterized by [*GATE EE* 2025]

 - a) $\hat{\sigma}_{MLE}^2 = \frac{1}{n} \sum_{i=1}^n (x_i \bar{x})^2$ which is a biased estic) $\hat{\sigma}_{MLE}^2 = \frac{1}{n-1} \sum_{i=1}^n (x_i \bar{x})^2$ which is an unbiased estimator of σ^2 estimator of σ^2 b) $\hat{\sigma}_{MLE}^2 = \frac{1}{n} \sum_{i=1}^n (x_i^2 \bar{x}^2)$ which is a consistent of $\hat{\sigma}_{MLE}^2 = \frac{1}{n-1} \sum_{i=1}^{n-1} (x_i \bar{x})^2$ which is an unbiased estimator of σ^2 and consistent estimator of σ^2
- 39) Consider a simple pooled regression model: $y_{it} = \beta_0 + \beta_1 x_{it} + v_{it}$ where $v_{it} = \mu_i + \epsilon_{it}$ and $Cov(x_{it}, \mu_i) \neq 0$. Here, μ_i captures the unknown individual specific effects and ϵ_{it} is the idiosyncratic error uncorrelated with both x_{it} and μ_i . If the parameters of this model are estimated using the ordinary least squares (OLS) method, then the estimated slope coefficient will be [GATE EE 2025]
 - a) biased

c) unbiased but consistent

b) inconsistent

- d) unbiased but efficient
- 40) Which of the following factor (s) do NOT affect output and employment in the classical macroeconomic model? [GATE EE 2025]
 - a) Quantity of money

- c) Level of demand for investment goods
- b) Level of government spending
- d) Technological progress
- 41) For the following function f(x) to be a *probability density function*, the value of c will be ______. [GATE EE 2025] (rounded off to two decimal places).

$$f(x) = \begin{cases} \frac{c}{\sqrt{x}}, & 0 < x < 4 \text{ and } c > 0 \\ 0, & \text{otherwise} \end{cases}$$

- 42) A six-face fair die is rolled once, with X being the number that appeared on the uppermost surface. Then the variance of *X* is ______. (rounded off to three decimal places). [GATE EE 2025] 43) Consider a Cobb-Douglas utility function given as $U(H) = (24 - H)^{1-\alpha} (wH)^{\alpha}$, where *H* is the number
- of hours spent working per day, and w is the wage rate per hour. If $\alpha = \frac{1}{2}$, then the corresponding labour supply (*inhours*) is _____ (*in integer*). [GATE EE 2025] 44) For a given foreign currency, if the forward exchange rate of delivery is 20 and the current value of
- spot exchange rate is 18, then the forward premium will be . (rounded off to two decimal places). [*GATE EE* 2025]
- 45) Two friends Aditi and Raju are deciding independently whether to watch a movie or go to a music concert that evening. Both friends would prefer to spend the evening together than apart. Aditi would prefer that they watch a movie together, while Raju would prefer that they go to the concert together. The payoff matrix arising from their actions is presented below. p and (1 - p) are the probabilities that Aditi will decide in favour of the movie and concert, respectively. Similarly, q and (1-q) are the probabilities that Raju will decide in favour of the movie and concert, respectively. Which one

of the following options correctly contains all the Nash Equilibria?

	Movie	Concert
Movie	2,1	0,0
Concer	0,0	1,2

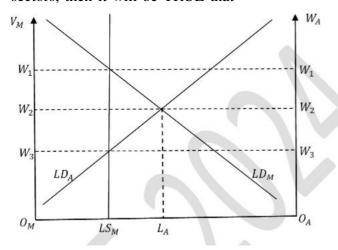

a)
$$(p = 0, q = 0)$$
; $(p = 1, q = 1)$; $(p = \frac{2}{3}, q = \frac{1}{3})c$) $(p = 0, q = 0)$; $(p = 1, q = 1)$; $(p = \frac{1}{3}, q = \frac{2}{3})$
b) $(p = 0, q = 1)$; $(p = 1, q = 0)$; $(p = \frac{2}{3}, q = \frac{1}{3})d$) $(p = 0, q = 1)$; $(p = 1, q = 0)$; $(p = \frac{1}{3}, q = \frac{2}{3})$

- 46) Consider a two good economy where a denotes consumption of apricots and b denotes consumption of bananas. Anu's utility function is $U^{Anu}(a,b) = a + 2b$, and Binu's utility function is $U^{Binu}(a,b) = \min(a,2b)$. Anu initially has no apricots and 12 bananas. Binu initially has 12 apricots and no bananas. In the competitive equilibrium, which one of the following will be Anu's optimal consumption bundle? [GATE EE 2025]
 - a) 6 apricots and 9 bananas

c) 4 apricots and 10 bananas

b) 9 apricots and 9 bananas

- d) 0 apricots and 12 bananas
- 47) A dual economy consisting of a manufacturing sector (M) and an agricultural sector (A) is depicted in the figure below. $O_M O_A$ is the total labour available in the economy of which $O_M L_{SM}$ is the labour supply in the manufacturing sector before any migration was allowed among the labourers. The vertical axis in the left (right) side measures the wage in the manufacturing, W_M $(agricultural, W_A)$ sector. LD_M (LD_A) is the demand of labour in the manufacturing (agricultural) sector with respect to O_M (O_A) as the origin. If wages are flexible, and labour is allowed to migrate between these two sectors, then it will be TRUE that

- a) Total amount of labour that will migrate from tor will be $L_{SM}L_A$ the agricultural sector to the manufacturing $\sec \varepsilon$) The wage in the manufacturing sector will be tor will be L_AL_{SM} W_3
- b) Total amount of labour that will migrate frond) The wage in the agricultural sector will be W_1 the manufacturing sector to the agricultural sec-
- 48) If *X* and *Y* are two random variables with the joint probability density function $f(x, y) = \begin{cases} \frac{2}{3}(x + 2y); & 0 < x, y < 0; \\ 0; & \text{otherwise} \end{cases}$ then $E\left[X|Y = \frac{1}{2}\right]$ will be $[GATE\ EE\ 2025]$

- 49) If a discrete random variable X follows the uniform distribution and assumes only the values 8, 9, 11, 15, 18, and 20, then P(|X 14| < 5) is $[GATE\ EE\ 2025]$
 - a) $\frac{1}{2}$ b) $\frac{1}{5}$ c) $\frac{1}{2}$ d) $\frac{1}{2}$
- 50) Assume the following probabilities for two events, A and B: P(A) = 0.50, P(B) = 0.70, and $P(A \cup B) = 0.85$. Then we can conclude that [GATE EE 2025]
 - a) A and B are mutually independent
- c) A and B are not mutually independent

b) A and B are equally likely

- d) A and B are mutually exclusive
- 51) The following table provides different statistical model specifications along with the elasticity of y_t with respect to x_t . Which one of the following options is correct?

Row	Statistical Model	Elasticity
1	$y_t = \beta_1 + \beta_2 \frac{1}{x_t} + \epsilon_t$	$-\frac{\beta_2}{x_t^2}$
2	$y_t = \beta_1 - \beta_2 \ln(x_t) + \epsilon_t$	$\frac{\beta_2}{x_t}$
3	$\ln(y_t) = \beta_1 + \beta_2 \ln(x_t) + \epsilon_t$	β_2
4	$\ln\left(y_{t}\right) = \beta_{1} + \beta_{2}x_{t} + \epsilon_{t}$	$\beta_2 x_t$
5	$\ln(y_t) = \beta_1 + \beta_2 \ln(x_t) + \epsilon_t$	$\beta_2 \exp(x_t)$
6	$\ln\left(y_t\right) = \beta_1 + \beta_2 x_t + \epsilon_t$	$\frac{\beta_2}{\exp\left(x_t\right)}$

[GATE EE 2025]

a) Only rows 3 and 4 are correct

c) Only rows 3 and 5 are correct

b) Only rows 1 and 2 are correct

- d) Only rows 4 and 6 are correct
- 52) An incumbent firm (*I*) faces the possibility of entry by a challenger firm (*C*). If *C* enters, *I* may either accommodate or fight. If *C* does not enter, its payoff is 1, while *I*'s payoff is 2. If *C* enters, and *I* accommodates, their payoffs are 2 and 1, respectively. However, if *C*'s entry is met with a fight by *I*, their payoffs are 0 and 1, respectively. Which one of the following is a *subgame perfect Nash equilibrium* (*SPNE*) under perfect information?

 [GATE EE 2025]

a) enter; accommodate

c) not enter; accommodate

b) enter; fight

- d) not enter; fight
- 53) For the function $F: \mathbb{R}^2 \to \mathbb{R}$ specified as $F(x,y) = x^3 y^3 + 9xy$, which of the following options is/are correct? [GATE EE 2025]
 - a) one saddle point

c) one strict local maximum

b) one strict local minimum

d) one global maximum

54) A decrease in the income tax rate has a _____ effect on the labour supply if the _____ effect dominates. [GATE EE 2025]

a) negative; incomeb) positive; substitution

c) positive; income

d) negative; substitution

55) Which of the following statements is/are FALSE?

[*GATE EE* 2025]

- a) The arbitrage pricing theory says that the prices which producers in different countries set for a particular product will be the same if the prices are expressed in the same currency using the current exchange rate
- b) The interest rate parity theory says that the interest rates on similar assets in two countries will always be the same
- c) The Purchasing Power Parity theory says that

the total prices of any basket of products which may split in two different countries will be the same, if the prices are expressed in the same currency using the current exchange rate

- d) The real exchange rate between two countries is the rate at which a particular basket of products produced in one country can be traded with a similar basket produced in another country
- 56) Consider the Solow growth model in which output (Y) is determined by the production function $Y_t = 0.2K_t^{0.8} + 0.8L_t$, where K_t and L_t denote capital and labour used in the production process, and t depicts time. The depreciation is given by δK_t , where $\delta = 0.2$. Saving is given by sY_t , where s is the saving rate. If the population does not grow with time, the steady state capital per unit of labour is ______ (ininteger). [GATE EE 2025]
- 57) Suppose XYZ Corp. is totally financed by equity, it is earning Rs. 2.50 per share; the current market price of the share is Rs. 20.00. There are 10,000 shares outstanding, and the replacement cost of the firm's real assets is Rs. 1,25,000. XYZ Corp.'s value of Tobin's *q* is ______ (*ininteger*). [GATE EE 2025]
- 58) An industry comprising only two firms produces a homogeneous product where the market demand function is given by $p = 200 2(q_1 + q_2)$ where q_1 and q_2 are the output levels of firm 1 and firm 2, respectively. The individual firm's cost functions are $TC_1 = 4q_1$ and $TC_2 = 4q_2$, where TC_1 and TC_2 are total costs of firm 1 and 2, respectively. If firm 2 is a Stackelberg Leader, and firm 1 is a follower, then the profit of the Stackelberg Leader will be ______ (rounded of ftotwode cimal places). [GATE EE 2025]
- 59) Let x and y be two dummy variables that take the values of either 0 or 1, and follow the bivariate frequency distribution as given below. If a logit regression is estimated with y as the dependent variable and x as the independent variable, then the estimated coefficient of x is ______ (rounded of ftotwodecimal places).

		0	1	Total
Ī	0	6	11	17
	1	6	7	13
	Total	12	18	30

[*GATE EE* 2025]

60) Based on the table given below, the current account deficit in nominal terms as a percentage of GDP during 2012-13 will be _____ (roundedofftothreedecimalplaces).

Expenditure on Gross Domestic Product (RupeesinCrores)	2010-11	2011-12	2012-13
At Current Prices			
1. Final Consumption Expenditures	4865	5857	6626
2. Gross Fixed Capital Formation	1388	1669	1813
3. Changes in Stocks	65	75	87
4. Exports of Goods & Services	1326	1698	1674
5. Imports of Goods & Services	1786	2317	2300
At Constant 2004-05 Prices			
1. Final Consumption Expenditures	4039	4340	4377
2. Gross Fixed Capital Formation	1026	1101	1035
3. Changes in Stocks	52	52	58
4. Exports of Goods & Services	1044	1239	1193
5. Imports of Goods & Services	1348	1594	1544

[GATE EE 2025]

- 61) In an economy, the effort level of a worker in firm i is denoted by e_i and depends on the wage W_i received by the worker from the firm, and the minimum wage W_0 is set by the government. The effort function is given by $e_i(W_i, W_0) = \sqrt{W_i W_0}$ If the firm employs N_i unit of workers, then the efficiency unit of labour employed by the firm is e_iN_i . The production is based on only the efficiency unit of labour, and the production function is given by $F(e_iN_i) = \log_e(e_iN_i)$ If the minimum wage set by the government is 10, and the profit maximizing firms sell the good in a competitive market at price P by choosing W_i and N_i , then the profit maximizing wage set by the firm will be $\underline{\hspace{0.5cm}}$ (roundedof ftoonedecimal place). $\underline{\hspace{0.5cm}}$ \underline
- 62) In a perfectly competitive market, suppose the market demand curve is given by P = 10 + W Q, where P is the market price, W is the average wealth of the consumers in the market, and Q is the industry output. The total cost function for a representative firm is given by $C(q) = q^3 2q^2 + 5q$, where q is the output of a firm. If W = 80, then the total number of firms in this industry in the long-run will be _____ (ininteger). [GATE EE 2025]
- 63) The estimated results of a Probit model is given in the table below, where Y is a binary variable taking the value either 0 or 1, and X is an integer. The probability that Y = 1 when X = 30 is _____ (rounded of ftotwode cimal places).

Variable	Coefficient	Standard Error	Z-Statistic	Probability
Constant	-0.064	0.399	-0.161	0.871
X	0.029	0.010	2.916	0.003

[GATE EE 2025]

64) Consider an industry with six firms. An analyst collated the data for this industry as given below. The Herfindahl-Hirschman Index (*HHI*) for this industry will be _____ (*ininteger*).

Firm	Market Share
F1	30%
F2	20%
F3	15%
F4	15%
F5	10%
F6	10%

[GATE EE 2025]

65) Consider a duopoly market where Firm 1 and Firm 2 produce differentiated products such that the

demand function of each firm is given by:

$$q_1(p_1, p_2) = 18 - p_1 + p_2$$

 $q_2(p_1, p_2) = 18 + p_1 - p_2$

Here, q_1 and q_2 are the outputs produced by Firm 1 and Firm 2, respectively, and p_1 and p_2 are the corresponding per unit prices. Cost of production for the *i*th firm is given by $C_i(q_i) = 2q_i \quad \forall i = 1, 2$. The firms compete in prices. The price set by Firm 2 such that the market is in Nash equilibrium will be _____ (ininteger).
